

Glow Stick Reaction

Science Experiment

Method

1. Prepare 1 jar of hot water and 1 jar of cold water.
2. Snap the glow sticks to get them glowing.
3. Place 1 glow stick in the hot water and 1 glow stick in the cold water.
4. Observe the difference between the glow sticks in the jars.

You will need:

2 glow sticks
2 glass jars
Hot water (not boiling)
Cold water
