

How to Make an Origami Heart

Step-by-step Instructions

You will need:

- A square piece of paper which is coloured on one side.
- Nothing else!

Step 1

- Place the paper coloured face down.

Step 2

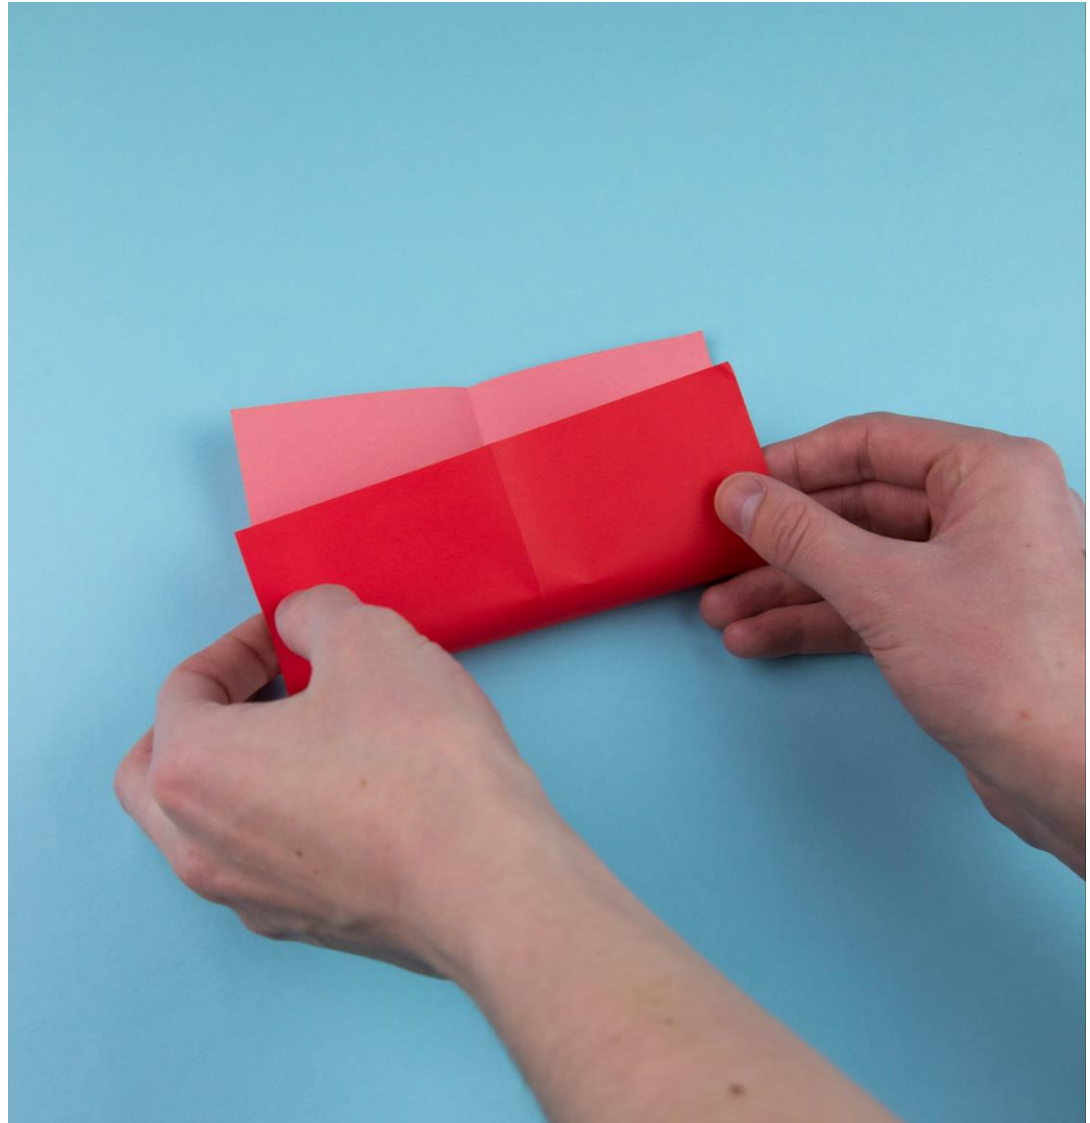

- Fold the paper in half lengthways. Before you make your crease, make sure you line up the edges so that they meet.

Step 3

- Unfold your paper.
- Fold your paper in half horizontally this time.

Make sure you line up the edges so they meet.

Step 4

- Unfold your paper.
- Fold the bottom of your paper upwards so that it meets the centre crease.
Line up the edges and then crease the paper down.

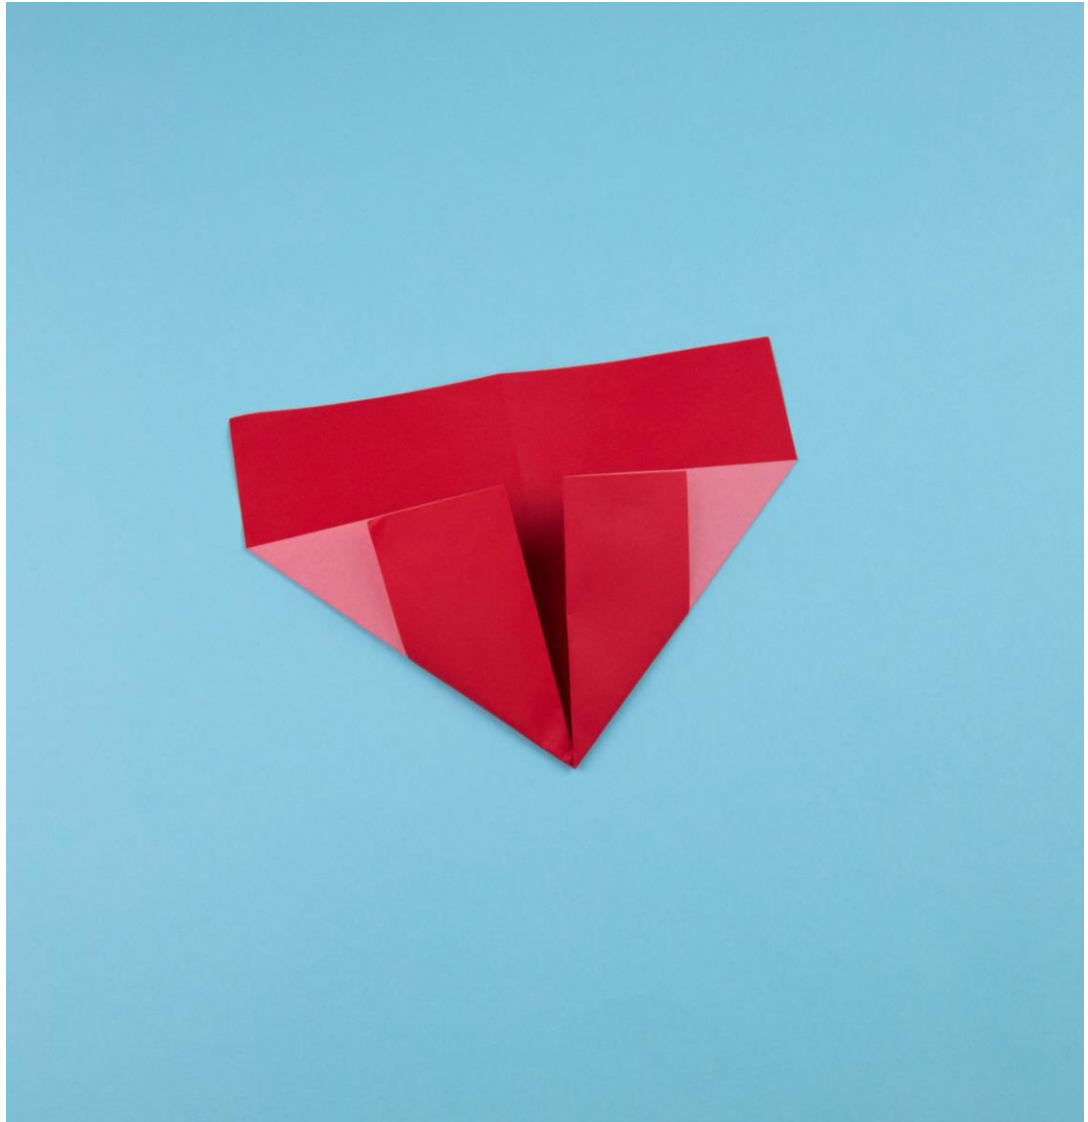

Step 5

- Turn your paper over.
- Fold the bottom left-hand corner of your paper upwards so that it meets the centre fold.

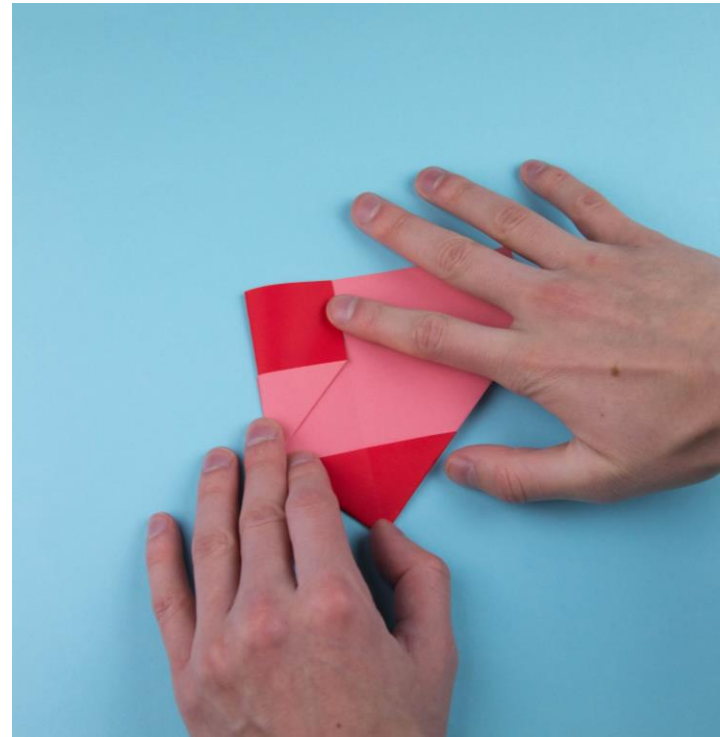

Step 6

- Do the same for the other side, making sure you line up the edge of the paper with the centre crease.

Step 7

- Turn your paper over.
- Fold the top left-hand side of your paper so that the edge meets the centre crease.

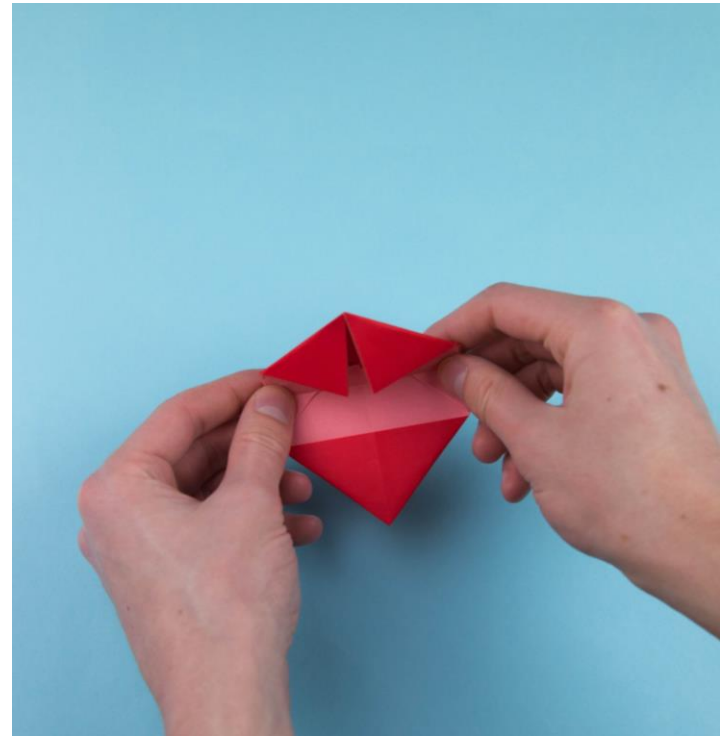

Step 8

- Do the same for the right-hand side.

Step 9

- Fold down the top left corner so that the corner meets the centre crease and then do the same with the right-hand side.

Step 10

- Fold your paper in half. Line up the edges before you crease it down.
- You will notice the paper doesn't sit flat.

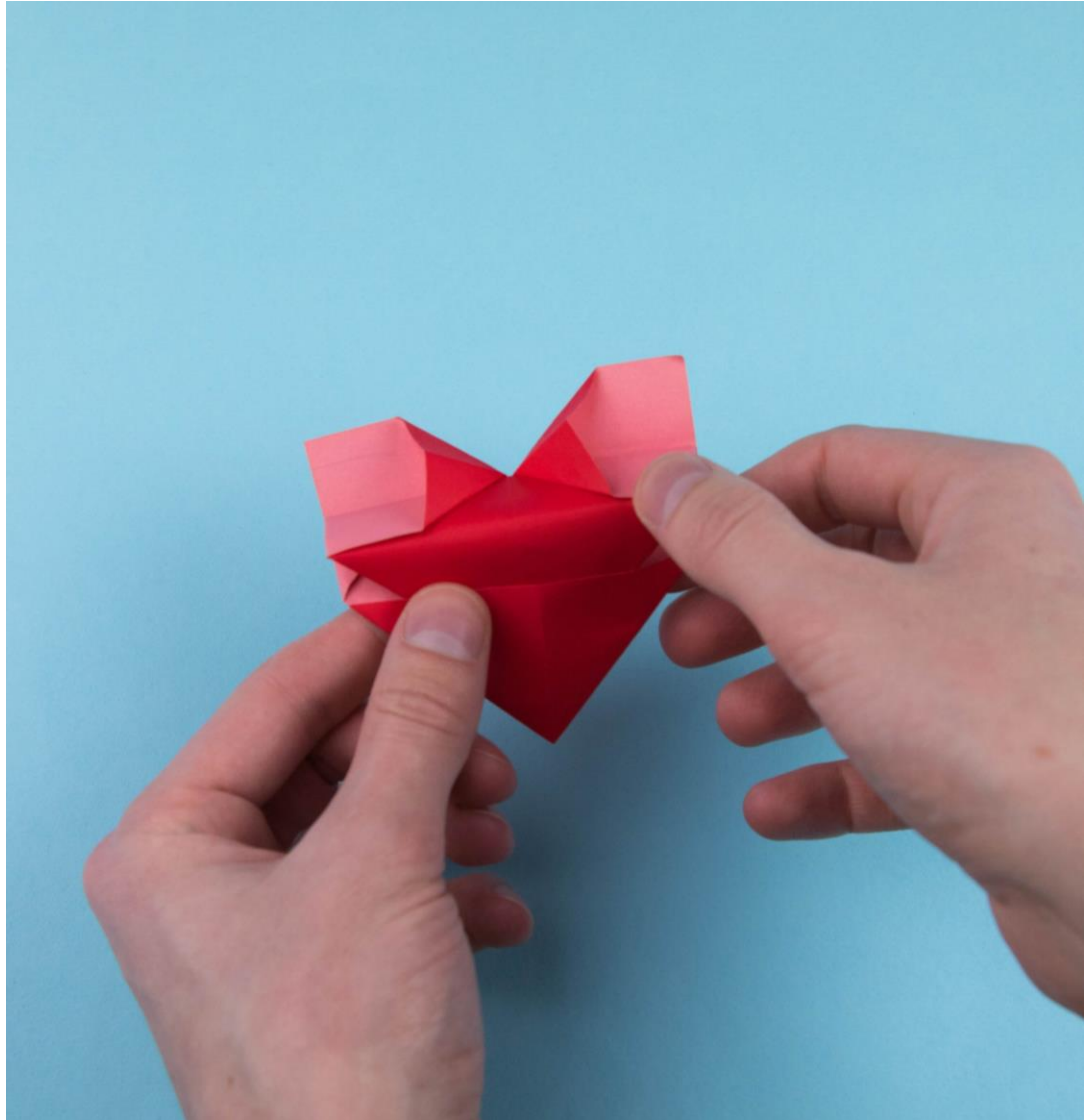

Step 11

- Line up the centre crease of the top left-hand side with the middle of the underside of the paper.
Crease it down.
- Do the same for the right-hand side.

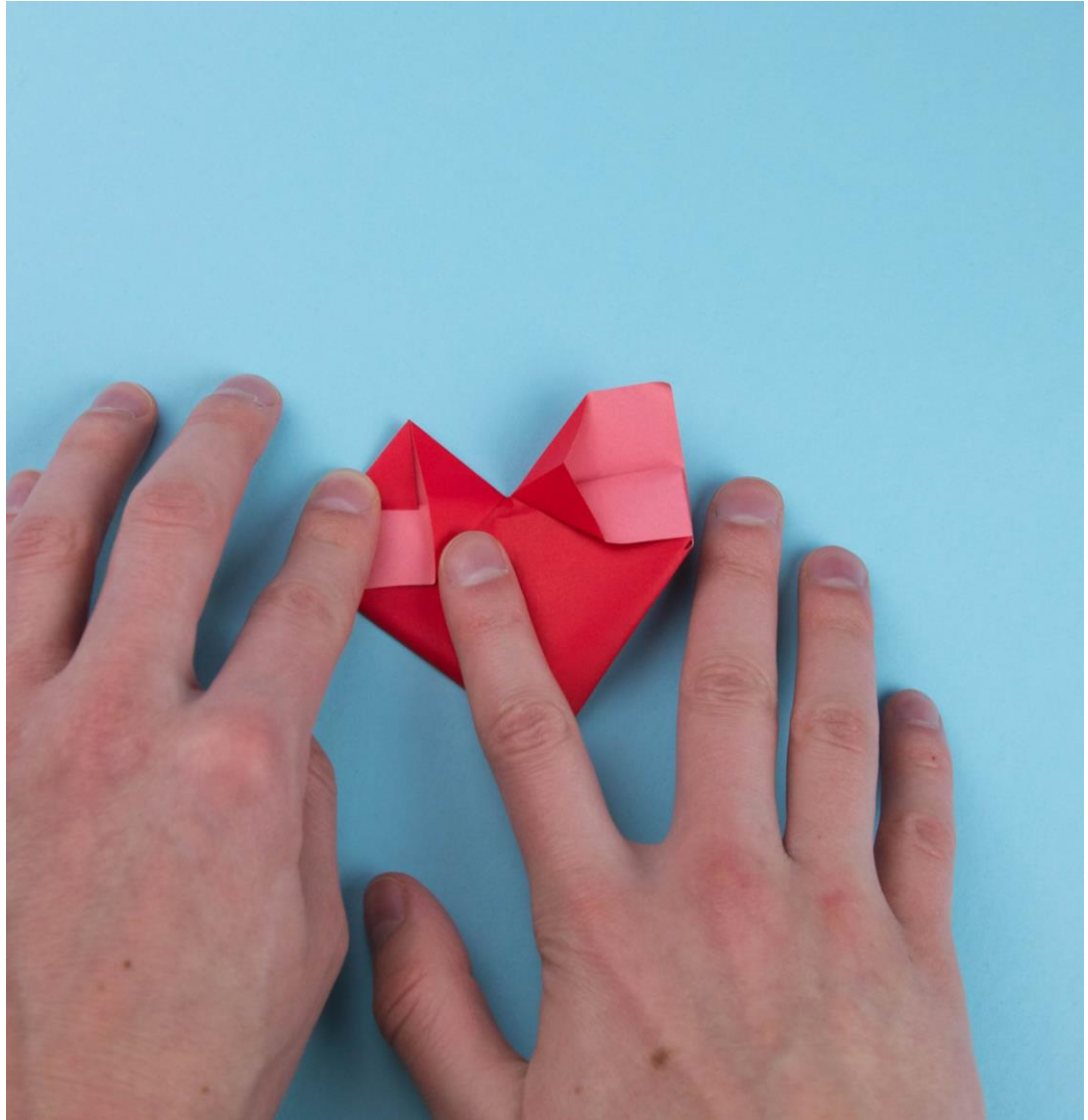

Step 12

- Open your paper up from the middle. You will notice that the bottom of your paper has a small pocket. You will need to fold the top half of your paper down and tuck it inside the paper pocket.

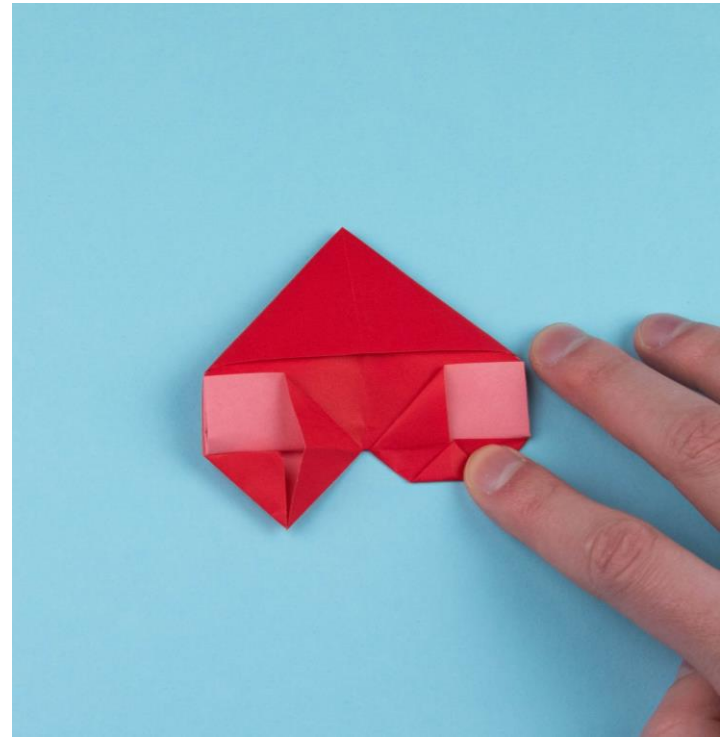

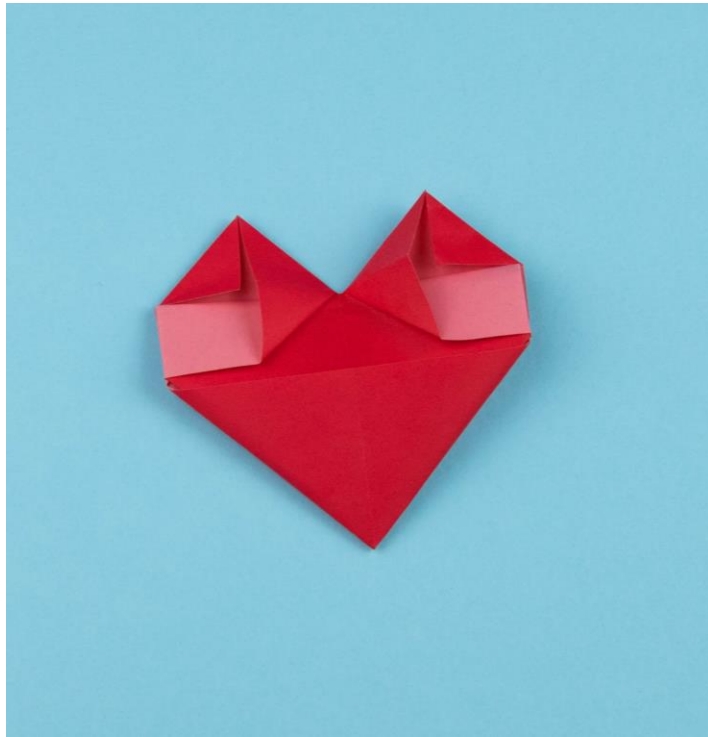

Step 13

- Fold the top left-hand corner of your paper over and line up the edges with the L-shaped crease. Crease down the paper.
- Do the same with the right-hand corner.

Step 14

- Take the top left point and fold it down so it meets the top crease.
- Do the same to the right-hand point.

Finished!

- Turn your paper over and you will see your finished heart!
